## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of:

TANZI et al.

Appl. No. To be assigned

Filed: Herewith (October 25, 1999)

For:

A Diagnostic Assay for

Alzheimer's Disease: Assessment

of AB Abnormalities

Art Unit:

To be assigned

Examiner:

To be assigned

Atty. Docket: 0609.4110001/REF/JUK

**Box: Patent Application** 

## Preliminary Amendment and Submission of Sequence Listing

**Assistant Commissioner for Patents** Washington, D.C. 20231

Sir:

In advance of prosecution, please enter the following amendments:

## In the Specification

Page 1, line 20, please delete "proteina" and replace with --protein--; and

/line 21, after "found" please insert --in--.

Page 16, at line 15, after "human Aβ peptide" please insert --(SEQ ID NO: 1)--.

Page 18, line 28, please delete "disolving" and replace with --dissolving--.

After page 60, please insert pages 61 and 62 attached hereto, which contain the sequence listing for the subject invention. Please renumber the remaining pages accordingly.

## In the Claims

Please rewrite claims 1 and 2 as follows:

- 1. (Once Amended) An [diagnostic] assay for detecting [and/]or quantifying A\(\beta\) peptide which may be present in a candidate solution, comprising:
- (a) contacting the candidate solution with a solid support with a heavy metal cation immobilized thereon to capture A\beta peptide on the surface of the solid support, thereby forming a first complex which comprises solid support/heavy metal cation/Aβ peptide;
